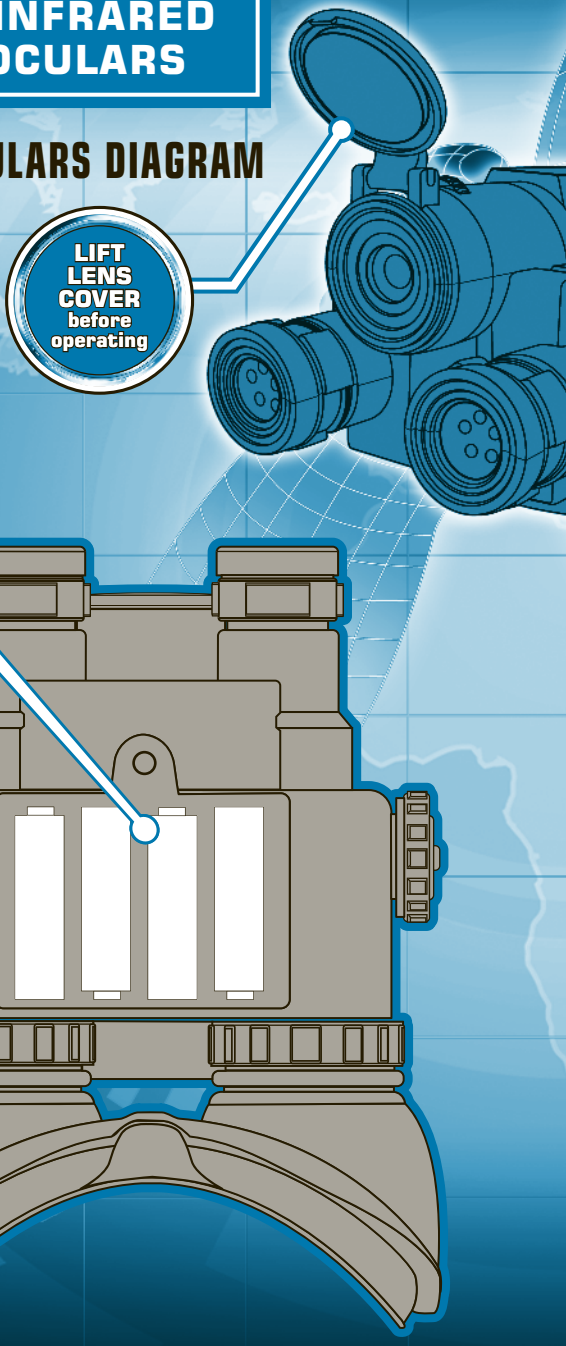
GEAR UP WITH THE SPYNET™ NIGHT VISION INFRARED STEALTH BINOCULARS

NIGHT VISION BINOCULARS DIAGRAM



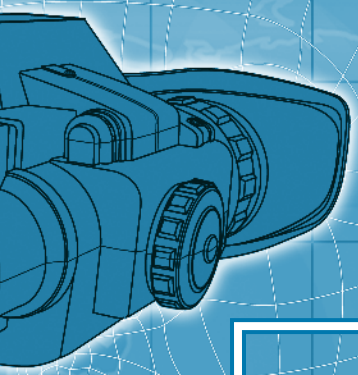
FOR SET-UP: (ADULT INSTALLATION REQUIRED)

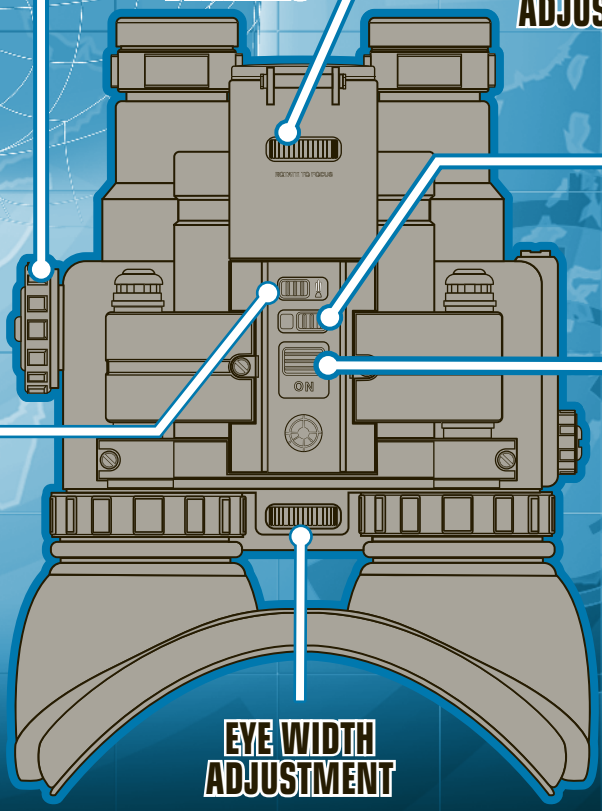
Requires 4 AA (LR06) alkaline battery (not included)

Battery installation: Locate the battery compartment underneath the unit. Using a Phillips screwdriver, remove the screw and the battery door. Install a fresh battery, matching polarity icons with those on the unit. Replace the battery compartment and the screw.

When operating in environments that are subject to electrostatic discharges, the SpyNet™ Night Vision Binoculars may malfunction. If this occurs, the user should reset the unit by using the on/off switch.

- **Powered by REAL Night Vision Technology, SPYNET™ Night Vision is the real deal!**
- **Invisible infrared illumination means you see them... but they can't see you.**

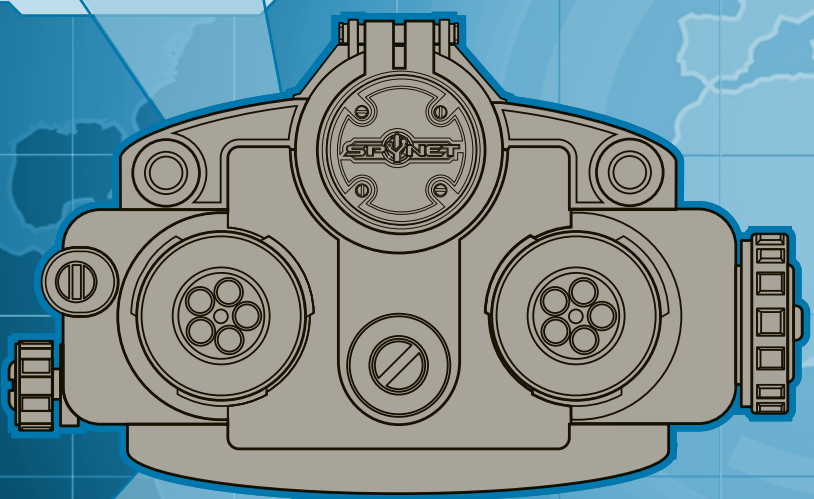




BRING ON THE NIGHT!

Maximum Surveillance *LONG RANGE* MODE

In this mode, the binoculars operate at full power and emit a barely visible ring of red light. See up to 50 feet/ 15 meters in absolute darkness!



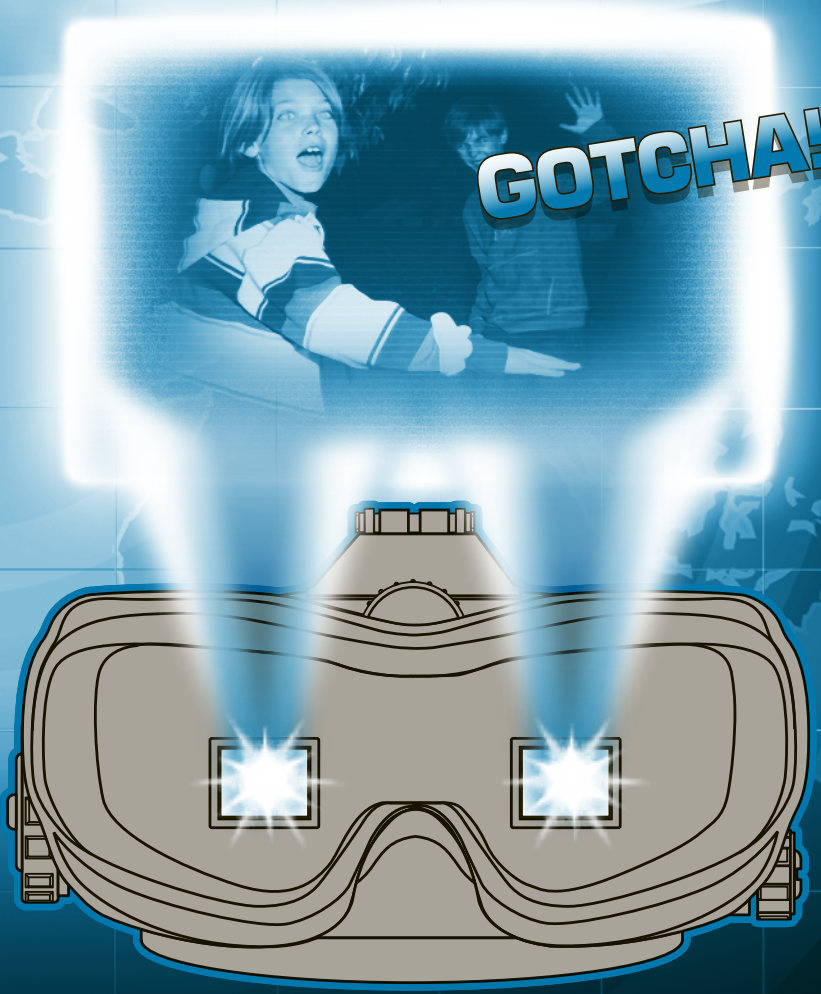
Close Proximity *STEALTH* MODE

In this mode, the binoculars operate at partial power and generate light that cannot be seen by the human eye. You see them, they can't see you!

AUTHORIZATION _ ALERT

BINOCULAR DISPLAY!

Monitor your home in the the dark of night and see what goes on when the lights go out. With the infrared sensitive optics and high contrast binocular view, YOU own the night!



STEALTH SAFETY

⚠ **WARNING: When using the SPYNET™ NIGHT VISION BINOCULARS, always follow these safety instructions:**

- If you experience any dizziness, discomfort or disorientation, remove binoculars immediately. Always use good judgment and common sense.

NEVER wear while operating vehicles or riding bicycles, skateboards, or skates.

NEVER explore surroundings that might be considered dangerous even during daytime.

NEVER use binoculars as a life-saving device since they are a toy.

ALWAYS use under adult supervision.

ALWAYS inspect your surroundings in daylight or with bright lights for hazards before using binoculars.

ALWAYS insert a fresh set of batteries before using binoculars.

ALWAYS carry a flashlight and extra batteries for when batteries run down.

ALWAYS use caution with binoculars since peripheral vision and depth perception are restricted. Scan continuously from side to side for hazards.

- Objects or persons viewed thru binoculars may be larger or closer than they appear.

- Binoculars (with reduced illumination and contrast) do not provide the same level of vision sharpness and image clarity compared to daylight conditions.

- When removing binoculars, allow time for your eyes to adjust and adapt to the darkness before moving around again.

- Take frequent breaks to prevent eye strain and tiredness.

- If you see two images when first looking through the binoculars, shift your eyes to the left and right then focus on the center of the screen.

Only batteries of the same or equivalent type as recommended are to be used.
Batteries are to be inserted with the correct polarity.
Exhausted batteries are to be removed from the toy.
The supply terminals are not to be short-circuited.
Different types of batteries or new and used batteries are not to be mixed.
Non-rechargeable batteries are not to be recharged.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

< Reorient or relocate the receiving antenna.
< Increase the separation between the equipment and receiver.
< Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
< Consult the dealer or an experienced radio / TV technician for help.
